

Book-Store: Empathy Map

Presented by Niharika Mente

JULY 2026

External Visual Influences

- Cluttered e-commerce sites frustrate users.
- Physical bookstores often lack niche selections.
- Friends express dissatisfaction with local offerings.
- Social media influencers highlight obscure titles.

Auditory Influences

- Users hear complaints about availability.
- Recommendations from influencers shape preferences.
- Friends share experiences with online shopping pitfalls.
- Feedback on user interfaces impacts expectations.

Internal State of the Avid Reader

THOUGHTS

Avid readers often **think about** finding their books quickly and securely, prioritizing a seamless experience to reduce frustration during their online shopping journey.

FEELINGS

They frequently **feel concerned** about hidden fees and potential data breaches, as security is paramount when engaging in online purchases of personal interests.

ACTIONS

These users often **say they** abandon their carts if the checkout process is tedious, valuing efficiency and ease above all in their digital interactions.

User Pains and Desired Gains

PAIN POINTS

Users often experience **tedious checkouts** which frustrate them. Hidden fees create anxiety, and poor mobile UI leads to abandonment of purchases.

DESIRED GAINS

Users seek a **centralized platform** that ensures fast load times and a streamlined checkout process, ideally within just one minute.
